

## DUAL INPUT ALARM BOX

- Single box with:
  - Two 120VAC trigger inputs. Each alarm is independent and can be triggered by either Temperature or Humidity readings.
    - High Temp or High Humidity
    - Low Temp or Low Humidity
  - Single Visual display for both alarms
  - Single Audible alert for both alarms
- Alarm conditions
  - Alarm will be audible (93db) and visual with the presence of voltage (120VAC) from one or both trigger inputs.
    - Audible alarm will silence after
      - Set time (adjustable over small range).
      - Silence switch is activated.
      - Alarm condition is removed.
    - Visual Alarm will all ways be on with an Alarm condition.
- Both trigger cables on the alarm must be plugged into the same control device (SS4). Not doing so will create a safety hazard.
